[sales@breaker.news](mailto:sales@breaker.news)

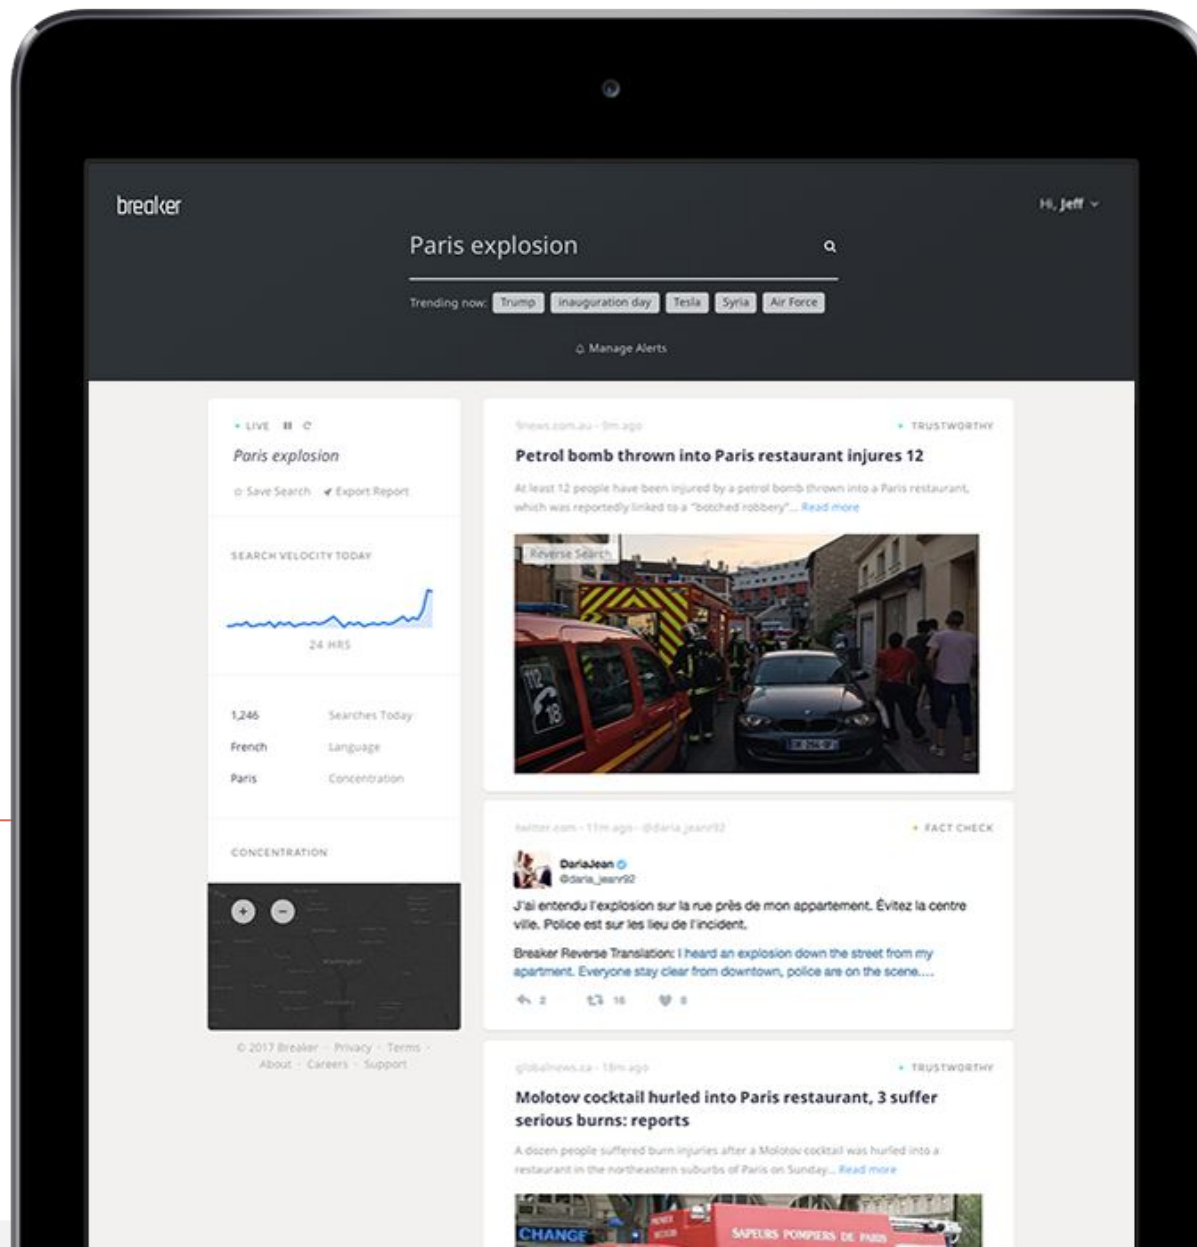

When a story is breaking,  
the internet floods with information.

As a news organization, you have to  
get it right. **And every second counts.**

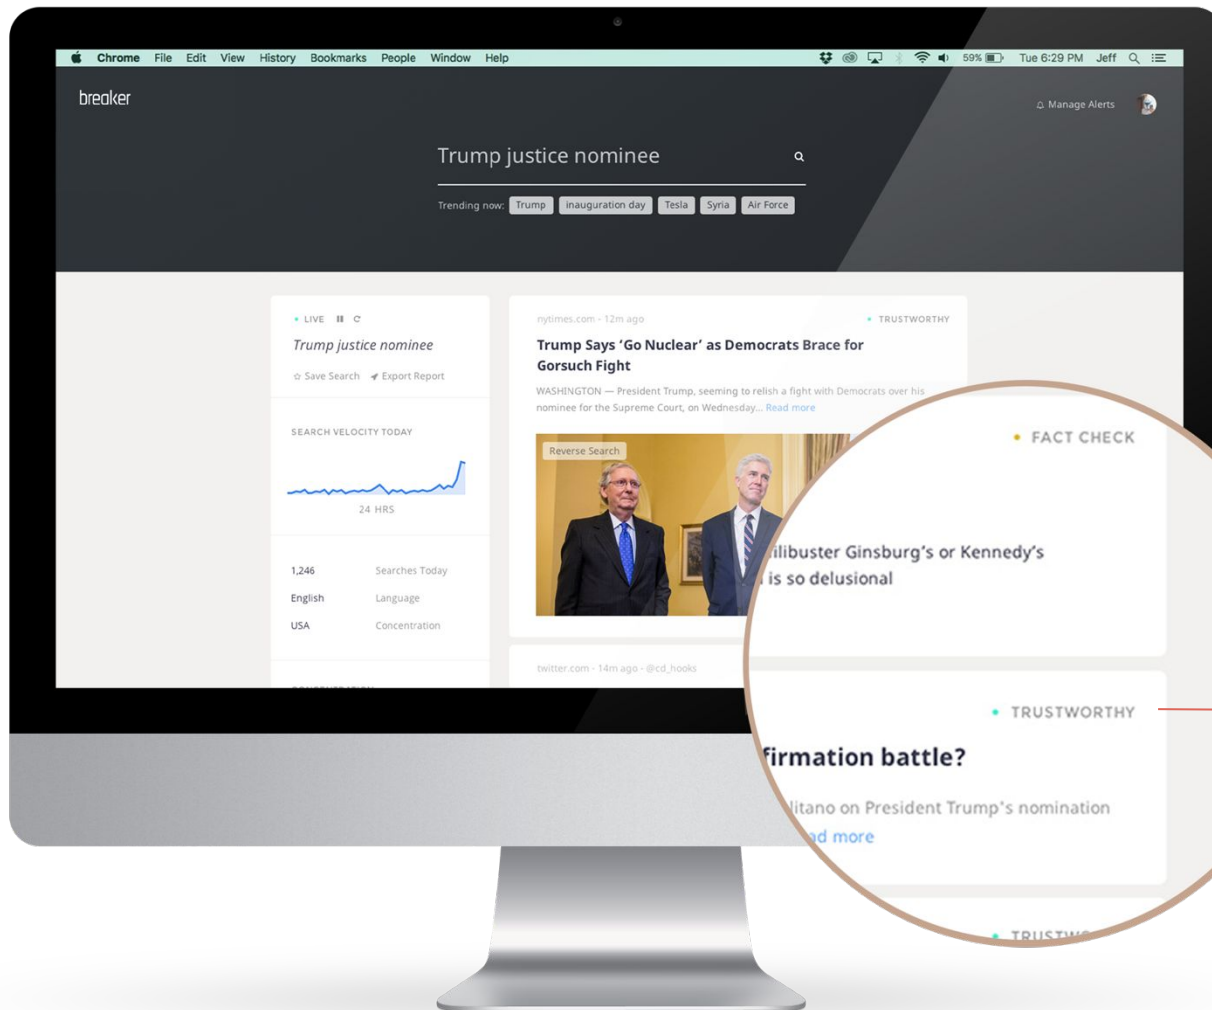

# Introducing Breaker

Breaker is a breaking news search engine that helps you identify sources you can trust.

# Trust Your Sources

Breaker identifies breaking news from over a million different sources and uses its veracity algorithm to surface the most trustworthy, relevant sources in real time.

# Source Media Manipulation Detection

---

Breaker uses machine learning to analyze media from a breaking source and assess the likelihood of manipulation.

Users can reverse image search to see where the original image first appeared on the internet.

# Cross-Organization Internal Collaboration

---

When deployed across multiple seats in your organization, users will be able to flag or annotate sources in real-time, allowing them to collaboratively identify and validate important breaking sources.

# Real-Time Alerts

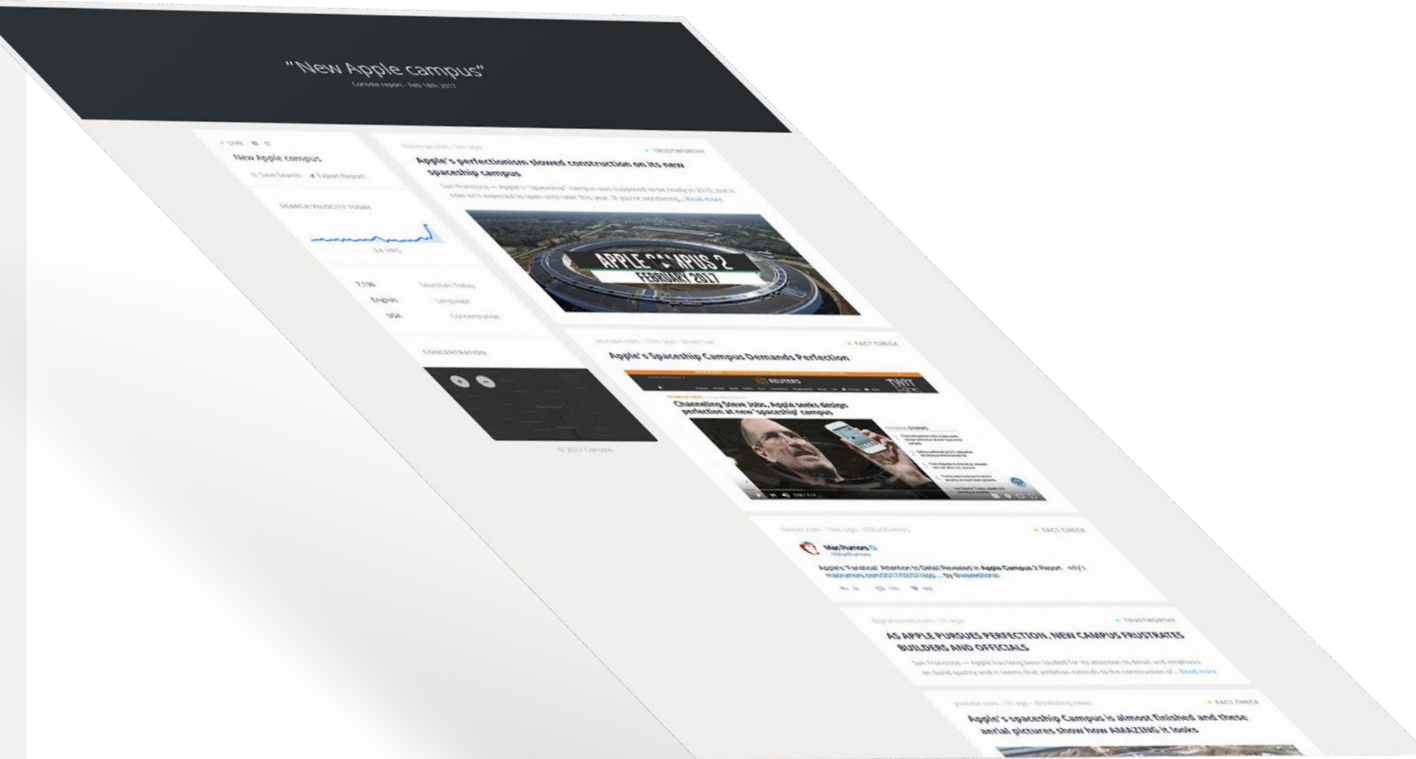

Setup granular breaking news alerts to your email or phone. Define the categories that you need to follow and set a confidence rating, so you can be alerted even before a story is confirmed.

# Print Out Elegant Hard Reports

---

With any breaking news event, it's important to communicate information quickly across your entire organization. With Breaker, you can quickly export results from a search to print or email.

# Simple Pricing

We offer a range of plans to suit the size of your organization or level of support you need.
